

ARMYTEK FLASHLIGHTS FOR SKIING

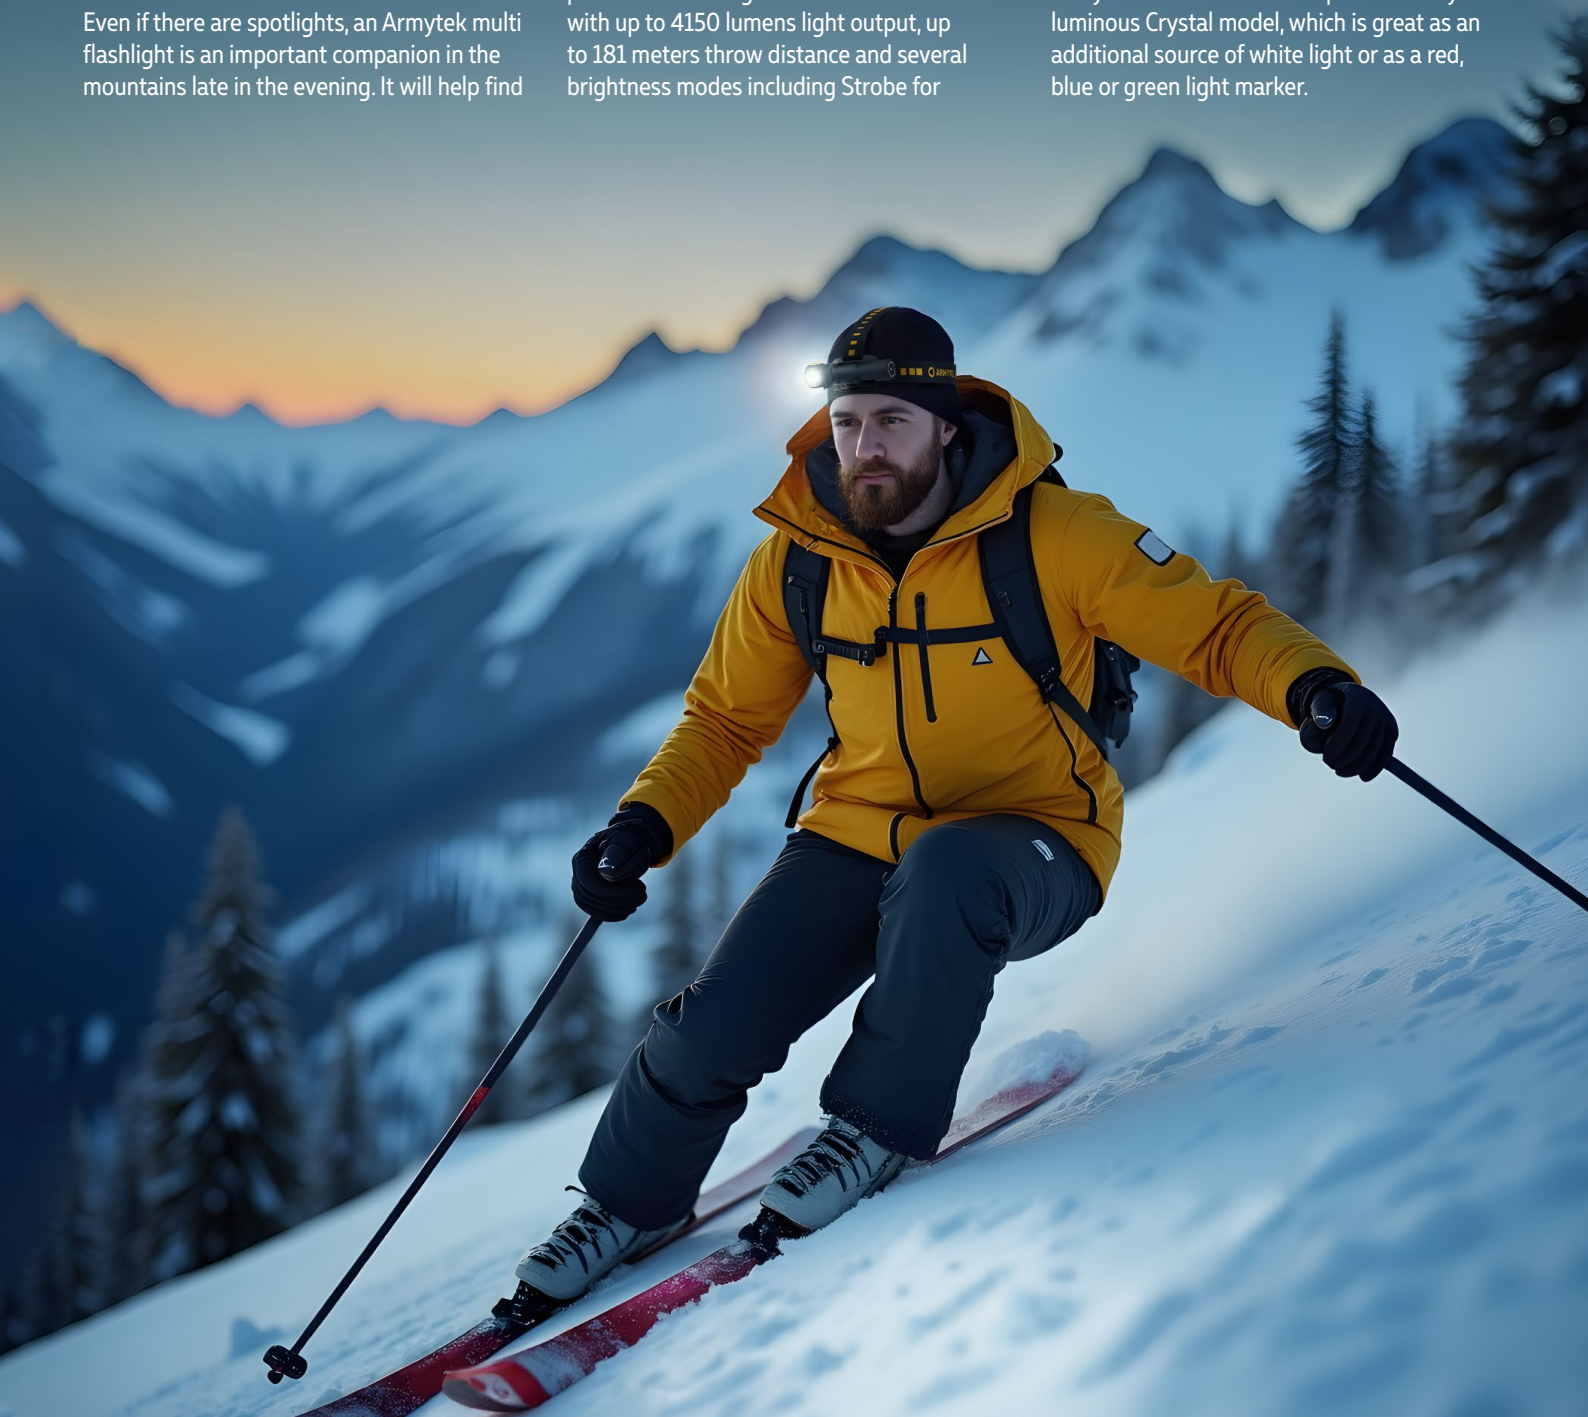

Skiing does not necessarily stop when night falls. On the contrary, under the starry sky the activity acquires particular magic. But what if the ski area is not equipped with special spotlights? Is the excitement over when the sun goes down? Not at all! With Armytek multi flashlights it is still possible to ski safely under the light of the full moon.

Even if there are spotlights, an Armytek multi flashlight is an important companion in the mountains late in the evening. It will help find

the way back to the place of stay, highlight a specific area or simply make a person visible to other skiers. All Armytek multi flashlights have three basic carrying options: they can be hand-held, attached to clothes using a clip or placed on the head as a headlamp.

Wizard and Elf series flashlights are the powerful aircraft-grade aluminium models with up to 4150 lumens light output, up to 181 meters throw distance and several brightness modes including Strobe for

emergency situations (depending on the model). They withstand mechanical impacts and provide constant light even at -25 °C. These flashlights are available with several light tint options: white, warm or close to natural (CRI >90), with warm and close to natural considered the most comfortable for prolonged use or use in a snowy area. Armytek also offers the compact and fully luminous Crystal model, which is great as an additional source of white light or as a red, blue or green light marker.

Features of Armytek multi flashlights

Headmount in the set: soft elastic bands securely hold the flashlight in place, do not rub the skin and leave no marks. The size of the mount is adjustable.

Specially designed optical system: transmits more lumens, provides comfortable wide spill.

Deliberate head design: new design for better heat dissipation.

Large side button: soft and comfortable pressing.

Innovated electronics: combination of high brightness and prolonged runtimes.

Improved springs: new springs for better protection of the battery and driver and increased performance efficiency.

Active real-time temperature control: ensures safe and comfortable use. When the temperature becomes close to +58 °C, the brightness decreases, which allows avoiding flashlight and battery overheating, as well as LED degradation. Compliant with European safety standards.

Total protection: protection from water, dirt and dust in accordance with IP68 standard. The flashlight continues to work even after submersion at up to 10 meters depth. Withstands fallings from up to 10 meters.

MAGNETIC USB CHARGER IN WIZARD SERIES

Robust and water resistant magnetic connector

USB-C CHARGER IN ELF SERIES

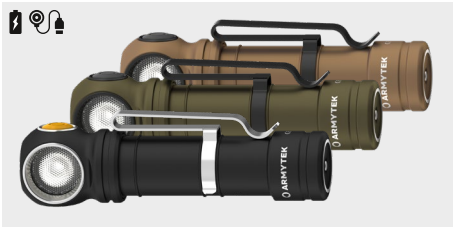

Water resistant USB-C socket even without rubber cover

USB-C CHARGER IN CRYSTAL SERIES

Water resistant USB-C socket

WIZARD C2 PRO MAX 4000 lm, 114 m

3 in 1 Headlamp, Every Day Carry, Sports

White 6957713003009 F06701C

BENEFITS OF WORKING WITH ARMYTEK

Armytek is a world famous manufacturer of high-tech flashlights, chargers and accessories. All Armytek products perfectly meet the buyer's requirements. We focus on quality and reliability: smart lineup allows us to thoroughly think through every detail before launching mass production.

HIGH PROFIT

Favorable conditions and flexible prices for bulk orders are ensured by own factories in China.

FAST SHIPPING

Warehouses around the world: the goods are always in stock and ready for shipment. Reduced costs and time of delivery, no additional customs fees required. Lower costs on shippings directly from the factories.

EXCEPTIONAL RELIABILITY

Minimum returns rate – less than 1% (competitors' rate is 5-7%). All products go through quality checking on test stands.

LEGENDARY SERVICE

Full support and cooperation: from placing an order to warranty service. Professional issue management, fast repairs and exchange.

NO HASSLE WARRANTY

Up to 10 years unprecedented warranty.

OWN FACTORIES

Every step of the process is controlled by our European specialists at the factories.

DEVELOPMENT

Head office in Europe. Team of highly qualified specialists from defence, aviation, space and other specialized industries.

EXPERIENCE

Expert in the fields of mechanics, optics and electronics. We specialize in development and manufacturing of flashlights and battery chargers since 2009.

COMPONENTS

Components by world's leading manufacturers. Powerful LEDs, innovative electronics, aircraft-grade aluminium, tempered glass, etc.

SMART LINEUP

Simple process of choosing a product, no bulky catalogs with a lot of similar variants. Only best models for client's needs.

NEW PRODUCTS

Armytek produces innovative and the most technically advanced products in the world.

PRIVATE LABEL, OEM/ODM

Creating new products, modifying our production models and personalizing them according to your needs.

MARKETING SUPPORT

We provide all the necessary promotional materials: leaflets, booklets, catalogs, etc.

CLIENTS' NEEDS RESEARCH

We systematically gather feedback to make sure that our products completely fit clients' needs and requirements.

Built to exceed
